

**technical data
Armergometer C100**

- **Width:** 45 cm
- **Height:** 90 – 220 cm
- **Weigth:** 36 Kg
- **Cover:** in two parts , ABS
- **Adjustment of heigth:** electric with hand switch assembly
24 Volt Dc motorgear
- **Transformer:** 230 VAC / 120 VDC
- **resistance:** wear resistant eddy current brake
- **Operation:** rpm depentent, rpm independent
Reversible
- **Voltage:** 110 / 230 Volts reversible
- **display:** LCD – display, user menue
- **Precision:** +/- 5 %
- **Indications:** Pulse, resistance, rpm, kjoule, kcal,
O²max, dynavit value, watts/kg
stop watch, using time ... and so on
- **Performance:** 5 – 999 Watts
- **Programms:** 4 – 14
- **Interface:** 1 x RS232 for testsoftware
- **Pulse masurement:** earsensor, wireless belt
- **Safety:** VDE, GS, ... and so on
